Change previously underlined in yellow (with no explanation between brackets) = change made following the CAPI tests and before the start of the national survey OR change made following the start of Wave 1 mothers and before the start of fathers.

Change previously highlighted in yellow (with an explanation if the change was made at the start of Wave 1 OR during Wave 1) = change made after listening to Wave 1 telephone interviews.

Change previously highlighted in green (Wave 2 change) = change made starting from Wave 2.

Sections to be duplicated or taken into account for twins: Placed child, Maintaining of relations with father if separated, Type of care, The child’s health, Extended family, Play, Food and The child’s development.
Repeat variables in green.

A distinction is made between 3 types of variables:

1. Repeat variables requiring confirmation or change. Consequently, these are worded: “Are you still...? “Are you currently...?”: NOMVARIABLE

2. Repeat variables that, for those present from one survey to the next, are documented solely for the management of filters or the consistency of the database. They are not displayed and thus not “confirmed” or “changed” where they have already been documented. However, they are asked to new “entrants” in the household or where the variable has not been documented previously: NOMVARIABLE

3. Non-repeat variables: NOMVARIABLE
